Pay Increase Voted for Hill. Top Officials

By Richard L. Lyons Washington Post Staff Writer

By a margin of a single vote, the House yesterday approved an annual cost-of-living pay raise for Congress and all other top-level government officials except the President.

Approved by the Senate Tuesday evening, 58 to 29, and strongly supported by President Ford, the bill assures pay increases this year, and as long as inflation continues, for more than 17,000 federal employees who have not had a salary increase since March, 1969. The cost of living has gone up 47 per cent during that period.

The legislation was requested by the President to stem the departure of federal judges and top civil servants for higher paying private employment. The bill covers members of Congress (who now make \$42,500), the federal judiciary (\$40,000 to \$62,500), the Vice President (\$62,500), Cabinet members (\$60,000), top military officers and employees in the top classified jobs now frozen at \$36,000 a year.

The bill also raises former President Nixon's pension of

\$60,000 a year, which is pegged to a Cabinet member's salary.

Under the formula in the bill, those covered by it will receive the same percentage increase each year as the Président recommends, under pay "comparability" statutes tally board on the wall of the (R-III.), Republican conference for lower-level civil servants.

The first increase, effective in October, is expected to range from 5 per cent to 8.6 per cent. The President's adfederal employees to maintain comparability with private em-5 per cent.
